PROBLEM SOLVING STEPS

01. WHAT IS THE PROBLEM (BE AS CLEAR AND SPECIFIC AS POSSIBLE)

02. BRAINSTORM AND WRITE DOWN ANY POSSIBLE SOLUTION (NOTHING IS TOO SILLY-THE MORE THE BETTER)

03. LOOK AT EACH POSSIBLE SOLUTION AND THINK ABOUT THE IMPLICATIONS. IS IT REALISTIC? IS IT LIKELY TO BE EFFECTIVE?

04. CHOOSE WHAT LOOK TO BE THE BEST SOLUTION (OR COMBINATION OF SOLUTIONS)

05. DID IT WORK?
